

# PGF

# OXYSHOCK

A stabilized oxygen compound designed to increase oxygen in the soil profile. Oxyshock may help reduce black layer and anerobic conditions due to its oxidizing properties

## APPLICATION RATE

10-20L/HA

Apply with a total water volume of 600-1000L/HA. Tank mixable with most soil applied products.

Active ingredient: 25% hydrogen peroxide

## DIRECTIONS FOR USE

SHAKE WELL BEFORE USE. Half fill spray vessel with required water. Add required amount of Oxyshock while tank is agitating.

COMPATABILITY: Oxyshock is compatible with a wide range of penetrant wetting agents and soil products. Always jar test before mixing.

AVOID CONTACT WITH EYES AND SKIN BY WEARING APPROPRIATE PROTECTIVE EQUIPMENT. IF SWALLOWED SEEK IMMEDIATE MEDICAL ATTENTION.
