## RESISTANT WEED WARNING

GROUP	<b>Z</b>	HERBICIDE
-------	----------	-----------

Passtox Clear Herbicide is a member of the Organoarsenic group of herbicides. For weed resistance management Passtox Clear Herbicide is a Group K herbicide. Some naturally occurring weed biotypes resistant to Passtox Clear Herbicide and other Group K herbicides may exist through normal genetic variability in any weed population. The resistant individuals can eventually dominate the weed population if these herbicides are used repeatedly. These resistant weeds will not be controlled by Passtox Clear Herbicide or other Group K herbicides. Since the occurrence of resistant weeds is difficult to detect prior to use, Colin Campbell (Chemicals) Pty Ltd accepts no responsibility for any losses that may result from the failure of Passtox Clear Herbicide to control resistant weeds.
