# Methar Tri-Kombi

and

# Sportsground

## BROADLEAF WEED CONTROL

### Advantages of Methar Tri-Kombi and Sportsground over Broadside

Methar Tri Kombi & Sportsground	Broadside	Methar Tri Kombi & Sportsground Advantages over Broadside
<p>3 active ingredients (Non ester formulation):</p> <p><b>Methar Tri-Kombi</b> <i>Mecoprop, 2,4-D, Dicamba</i></p> <p><b>Sportsground</b> <i>Mecoprop, MCPA, Dicamba</i></p>	<p>3 active ingredients (ester formulation)</p> <p>Bromoxynil, MCPA, Dicamba</p>	<p>The active ingredients and formulation of Methar Tri Kombi and Sportsgorund are different and unquie to turf.</p> <p>Methar Tri Kombi and Sportsgorund are non ester formulations and hence can be used all over Australia. Broadside being an ester has restricted use in certain parts of Australia including Victoria.</p> <p>The ester formulation of Broadside works more on a burning of the weed while the non ester formualtions of Tri Kombi and Sportsground allow for a more complete kill of the weed and less burn potential of turf.</p>
<p>Rate: 4.2L per hectare</p>	<p>Rate: 4L-5L per hectare</p>	<p>Methar Tri Kombi and Sportsgorund only need one rate to eliminate all weeds, while Broadside uses more chemical for harder to kill weeds hence value for money in using less chemical.</p>
<p>Pack Sizes Tri Kombi 25L, 5L and 2L containers</p> <p>Sportsground 10L</p>	<p>Pack Sizes 20L and 5L</p>	<p>Different sizes allow for more flexibility for users and less carry over stock for Methar Tri Kombi and Sportsground.</p> <p>The 10L Sportsground was brought in for easier handling</p>
<p>25L Tri Kombi drum will cover 6 hectares</p>	<p>20L drum will only cover hectares</p>	<p>For example to treat 10 hectares you would only need 2 drums of Methar Tri Kombi. While to treat 10 hectares with Broadside you will need up to 3 drums.</p>
